**Immix Bench System**

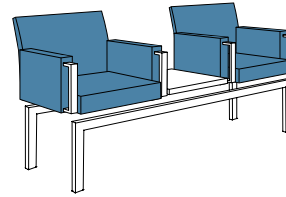

Combine curves and straight sections to create shapes and unlimited spans of seating and tables. A variety of seat and back widths can be mingled with tops of various shapes, materials and edges.

When planning a space with Immix, keep the same considerations in mind as you would when specifying product for any other space. How will the space be used? Do you need power and data? Will the product need to be moved or reconfigured in the future? Are there special user needs to be considered? Think about these and any other issues you may encounter when you plan your space.

If you are creating a configuration for a waiting room or lobby, feel secure that the Immix benches you choose have been designed and engineered for longevity with enduring finishes and high density foam. If you have particular needs that have not been addressed in this price list, please call Versteel Customer Service for answers and recommendations.

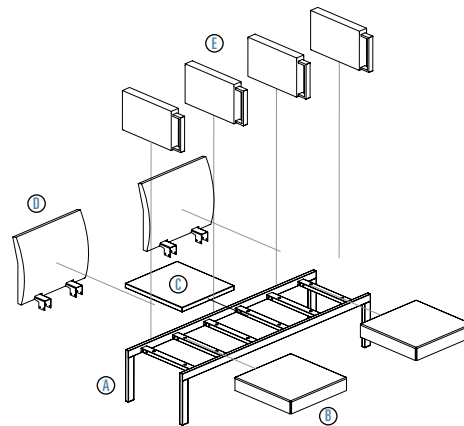

**Standard vs. À la Carte**

A wide range of 'standard' models have been established for easy ordering, but Immix benches are designed so that you can configure various combinations or styles using the A la Carte section starting on page 145.

Order the standard item found under the 66" Frame section of this price list.

(1) IM2066 15 FC

**OR...**

Build any bench from the A la Carte menu. Start with a frame, then add the elements you desire.

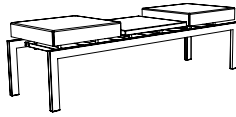

- A. (1) IMAC 2066 (66" frame)
- B. (2) IMAC 2020US (20" upholstered seats)
- C. (1) IMAC 2019RE (19" top)
- D. (2) IMAC 2022UB (22" upholstered backs)
- E. (4) IMAC 2011UA (upholstered arms)

The À la Carte section was developed for many purposes.

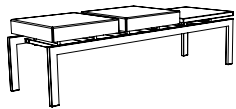

- Custom bench configurations
- Replacement parts
- New components to change color scheme
- New components to alter existing configuration

#### Reconfigure A Standard Model

A standard configuration listed in this price list may have all the elements you desire, just not in the desired order. No problems. Simply call Versteel Customer Service and a representative will happily assist you with your order.

① IM2066 11 FC (standard model)

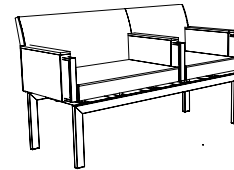

② IM2066 11 FC SST (reconfigured from standard model)

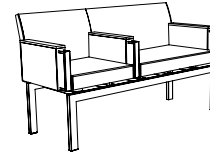

1. A standard Immix unit as found in this price list, with 20" upholstered seats and a 22" table in the middle. It has the elements you want, but not in the right order.
2. All the same elements but with the table positioned on the right, where you want it. Simply add SST at the end of your model number to indicate a seat-seat-table configuration. Contact Versteel Customer Service if you have any questions.

#### Mirror A Standard Model

In this price list you will find many standard models, but not every configuration. All of the models listed can be mirrored to fit your needs with no additional charge. To specify a mirrored model just add the letter M to the standard model number when you order. Should you have any questions or concerns call Versteel Customer Service.

① IM2055 D05 (standard model)

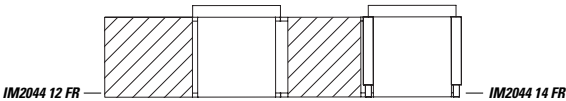

② IM2055 D05 M (mirrored model)

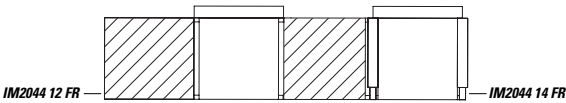

1. A standard Immix unit as found in this price list, with a 31" upholstered seat on the left and a 20" upholstered seat on the right. It has the elements you want, but you would like them flopped.
2. The mirror image of the standard model reverses the order and puts the seats where you want them. All that is required when specifying is to add M to the standard model number to achieve this configuration.

**Arm to Armless & Armless to Arm**

You may want to create a configuration where you will place a top between a seat with arms and a seat without arms on the same frame. Or even connect benches with arms to benches that are armless. In these cases it is possible to use standard tops, but Versteel has also designed tops just for this scenario. By using these tops, which have been specially sized, spacing will remain even throughout the configuration. Please indicate on your order or quote if the arm to armless top is desired.

Arm to armless configuration with standard 19" top.  
Notice the uneven spacing.

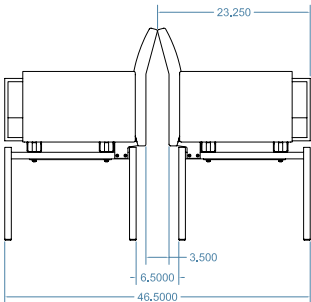

Arm to armless configuration with special 21" top.  
The spacing is now consistent.

**Back to Back Installations**

When you are creating a space using Immix benches, don't forget that the benches with backs have a slightly deeper footprint. If you plan to place benches with backs in a 'back-to-back' configuration, use the dimensions provided here to insure you will have plenty of space for installation.

Be sure to review the Space Planning section in the Tables Price List for additional general guidelines to consider when designing a space.

Always refer to local codes for restrictions and requirements.

**Power, Data and Wire Management**

It may be desirable to provide power and data access to your Immix configuration depending on the end use application. If so, then plan for your power and data as you would any other specification, keeping in mind where the power will come from as well as the load that will be placed on the circuit.

Review the Power & Data Planning section that is found in the Versteel Power & Data Price List for more information. If there is any risk that the circuits may not be able to carry the load, contact a qualified electrician. Also, always consult any local codes or restrictions concerning power.

Use the drawings provided on the next page to determine the location(s) you want to place power and data or grommets in your configuration.

**Power & Data**

Immix tables and benches with tops can be individually powered with Henris or sequenced using Henri Nows. Use Henri and Henri Now to conveniently power laptops and other portable electronic devices. When power and data are not required, the units will conveniently store under the table leaving the top unobstructed for usage and cleaning.

When sequencing electrical units, Henri Now must be used.

Henri units are not available on 8", 10" or 11" tops.

**Wire Management**

Use grommets to route cords for lamps and other devices through a table top to an outlet.

### Locations For Henris and Grommets

#### Rectangular Frames

Henris, Henri Nows and grommets must be located between the cross rails on Immix frames. There are five locations for the rectangular frame that can be combined and cross-referenced for more than one application. The logic for positioning is that as the frame grows in length, from left to right, the position moves along with it. A 22" frame has one position (Location 1) as there is only one space between cross rails. A 44" frame has 3 positions (Locations 1, 2 & 3) as there are three spaces between cross rails. The drawings at right illustrate the positions for rectangular frames and how to indicate where you would like Henris, Henri Nows or grommets.

#### Arc Frames & Corner Connectors

There are four locations for the arc frame positions and one for corner connectors. The drawings below illustrate the positions for Henris, Henri Nows and grommets.

**Large Configurations**

Larger spaces may require a larger configuration, and these may be intimidating. If you are concerned that the curves and angles you are specifying may not be the correct ones, call Versteel Customer Service for input and advice.

Versteel will also help you configure your Immix bench system if needed. Simply call Versteel Customer Service and provide the dimensions of your space and the type of configuration that you desire. Like any other space planning, it is helpful to know where power and data sources are, as well as windows, doors, and any other obstructions and proposed traffic patterns.

### Studio Steel®

Versteel's "urban fabrication" process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Studio Steel Process . . . . . \$158 per chair

### Powder Coat Finishes

All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.
