Care of Laminate Surfaces, T-Mold, Bumper, PVC Edges and Urethane
Clean with a mild soap solution and rinse with clean, clear water. Wipe the entire surface, moving with the pattern and follow with a clean, dry soft cloth. When a wood edge exists, follow instructions found under "Care of Wood Edges and Veneer Surfaces".

Care of Wood Edges and Veneer Surfaces
Clean all surfaces frequently with water-dampened soft cloth, moving the cloth with the grain direction. Quickly buff dry. Immediately remove any liquids that come in contact with wood surfaces using a blotting action to absorb liquid. Lift objects to move them. Never pull them across the finished surface.

For an additional safeguard, use a protective surface pad. Doing so could ensure a lasting finish by protecting your furniture from possible damage caused by pens and sharp objects.

Avoid exposing furniture to extreme heat and cold or to wide humidity variances. Avoid exposing furniture to strong sunlight. Do not use soaps, commercial cleaners or harsh solvents (nail polish remover, acetates, etc.) as they will cause finish deterioration. If using a protective glass top, place spacer pads under the glass top to allow the wood to breathe.

Care of Corian® Surfaces
Clean regularly with a cloth or sponge wrung out in warm soapy water. You can also use ammonia-based cleaners or commercial cleaners recommended for use on Corian® surfaces. Wipe up any water spills immediately so as not to leave a film that makes the finish look blotchy.

Care of Powder Coat Work Surfaces
Clean with warm water and mild soap and rinse with clean, warm water. Windex Multi-Surface Disinfectant and Windex All Purpose cleaner can be used for deep cleaning. Using a pump spray bottle, apply a normal amount of cleaner onto a clean microfiber or paper towel. Wipe the desired area until dry. Do not spray directly onto the surface or let sit un-wiped for an extended period.

Care of KrystalCast® Surfaces
Clean with a dish soap and water mixture in a spray bottle with a Green Scotch Brite 3M scrub pad to loosen all dirt and goo (including oil and wine stains, etc). Dry with a clean dry cloth. Do not use solvents such as acetone, lacquer thinner, gasoline, undiluted alcohol or benzene.

Care of Powder Coat and Nickel
Clean with a mild soap solution and rinse with clean, clear water. Wipe the entire surface and follow with a clean, dry cloth to buff dry.

Care of Chrome Bases
Clean with a wet cloth or window cleaner. For scuff marks or heavy soiling, a non-abrasive automotive chrome polish can be applied as directed.

Maintenance of Mechanical Parts
Clean any lint or debris from the moving parts of the E-Z install tilt or folding base mechanisms. Do not apply lubricant. Mechanisms have been designed and tested to not require lubrication under normal conditions.

Care of upholstered Tack Panels
For Versteel standard fabrics and vinyls, consult the back of the appropriate swatch card for cleaning codes and any specified instructions. For COM materials, consult with the individual textile manufacturer for cleaning codes and any specified instructions pertaining to your particular fabric.

The Folding Form Modesty panel is mounted to the top with heavy duty steel hinge assemblies. A sliding brace supports the modesty panel in the set-up position and also holds the modesty panel in place in the stored position. Extruded back panel is black with powder coat options for the perforated steel door. Powder coat finish on perforated door matches the base finish unless specified differently. Transparent powder coat finishes are not available.

NOTE RADIUS CORNERS ARE NOT RECOMMENDED ON THE TABLE TOP WHEN A FORM MODESTY IS SPECIFIED

Fixed Lightweight Form Modesty
(FixLightweightFormMod XL or XLS)
The Fixed Lightweight Form Modesty panel is a lightweight version of the Versteel Form Modesty. It is a formed steel perforated panel that is mounted to the top with screws through steel brackets. It must be field installed into pre-drilled positions in the top. A deep channel in the back of the panel allows for the routing of power and data cables inside of the modesty. Mounting hardware is packed with the modesty panel. Powder coat finish on the perforated panel matches the base finish unless specified differently. Transparent powder coat finishes are not available.

NOTE RADIUS CORNERS ARE NOT RECOMMENDED ON THE TABLE TOP WHEN A FORM MODESTY IS SPECIFIED

NOTE XLS INDICATES STRAIGHT MODESTY CONSTRUCTION WITH SQUARE HOLES

Hanging Modesty (HangMod HM)
The hanging modesty is mounted to the top with a metal hinge that is factory installed. This mechanism pivots if the table is tilted to allow for a 90 degree slim-tilt. Finish details match the top unless specified differently.

Removable Lightweight Form Modesty
(RemLightweightFormMod RL or RLS)
The Removable Lightweight Form Modesty panel slides into heavy duty steel brackets that are mounted to the top. Simply tighten the handwheels to secure the modesty in position or loosen them to remove the panel. Powder coat finish on the perforated panel matches the base finish unless specified differently. Transparent powder coat finishes are not available.

NOTE RADIUS CORNERS ARE NOT RECOMMENDED ON THE TABLE TOP WHEN A FORM MODESTY IS SPECIFIED

NOTE RLS INDICATES SQUARE MODESTY CONSTRUCTION WITH SQUARE HOLES

Panel Modesty (MPL and MPV)
The Panel Modesty is constructed of ¼" hardboard core with laminate or veneer face and back surfaces, machined with exposed edges. Panel Modesty can be specified on both fixed and tilt-nest-fold base tables and will swing out to nest on the table. The 8 ½" high Panel Modesty is field mounted with hook brackets, installed with handwheels under the table top. Threaded inserts are installed in the top when Panel Modesty is specified with the table. Panel Modesty shapes complement the rectangle and are rectangle top shapes. Finish details match the top unless specified differently.

Sail Modesty (MS__)
The Sail Modesty panel is constructed of Lycra® fabric hooked into slotted holes on the table legs then stretched and hooked over pegs on the under surface of the table top. Sail Modesty panels can be specified on both fixed and tilt-nest-fold base tables and can be stored on table when tilted, nested or folded on table transport. All TIM tables are pre-drilled for the field installation of the Sail Modesty. Top pegs are installed when Sail Modesty is specified with the table. Sail Modesty is available in coordinating colors of Alabaster, Alloy, Ebony and Frost.

Top Shapes and Grain Direction

Fixed Configuration Conference Tops

Conference tops may use fixed configurations to achieve larger than normal sizing and seating accommodations, but there are some specific items that must be considered. These large conference tops are generally greater than 60" wide and 240" long.

By contacting Versteel Customer Service with your vision we can help you engineer and produce your table. Below is a list of important points we will address.

MATERIAL YIELD

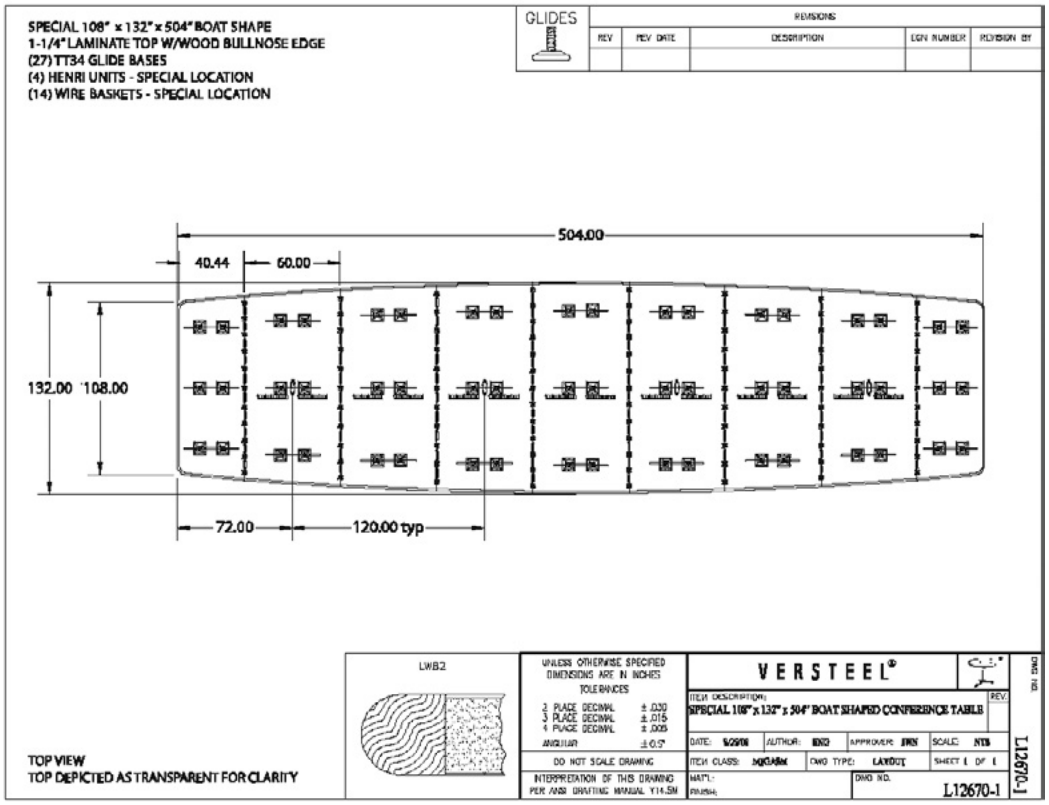

Most laminate is available in a maximum sheet size of 60" x 144". Versteel can design shapes and linking configurations that will maximize material yield.

LAMINATE PATTERNS

Versteel can minimize seam lines by designing and positioning the linking configuration to take full advantage of your laminate pattern.

BASES AND JOINTS

Larger sections can be produced to limit the number of bases and joints required.

At right is a typical Versteel drawing of a large, fixed configuration conference table. The extremely large size (504" x 132") required nine (9) sections and twenty-seven (27) bases. Power and data options have been incorporated into the drawing.

Configuration Guidelines

Often we receive requests to assemble room configurations that one would assume are very easy. but without the proper input, it is not so simple. Below are some common questions that will help to define your needs as well as enable us to help you specify your tables.

Define Your Space

Start by asking yourself what you really want to accomplish in your room.

How will your room be used? Will you need breakout groups, is it a classroom with rows, or a boardroom? Do you need a T-shape, U-shape, or hollow square table group? Are there any special modifications that are specific to you application?

Besides the size of your room, here are some other items that you should take into consideration:

- instructor or speaker area
- wall with boards and/or audiovisual equipment
- door and window locations
- anything else which may interfere (columns, steps, ramps, HVAC, etc.)

Define Your Needs

Your table considerations should begin by thinking about the need for the following items:

- modesty panels
- linking
- power and data
- wire management and grommets
- keyboard trays
- fixed, folding or tilt bases
- special needs (alternate or adjustable height)

Your Seating considerations should begin by thinking about the need for the following items:

- assume a 30" width per person
- mobility (casters)
- stacking or storage issues
- usage and wear (upholstery or wood)
- adjustable height
- function (task specific or multiple)

Common Room Layout Guidelines

The following are general guidelines only. Always refer to local codes for restrictions and requirements.

By using the guidelines below and the information that you supply (from answering the previous questions), Versteel can help you specify he tables and seating you need to make your space function at its maximum potential.

Between Rows Allow Four Feet (4')

If rows are used, four feet (4') between rows is considered adequate in order to provide space for movement.

Instructor Allowance of Eight - Ten Feet (8'-10')

A minimum of eight to ten feet (8'-10') should be allowed for the instructor's space, from the wall to the approach side of the first table row.

Back Wall Allowance of Seven Feet (7')

Space consideration for the back wall is necessary. A minimum of seven feet (7') from the back wall to the user's side of the last table is suggested.

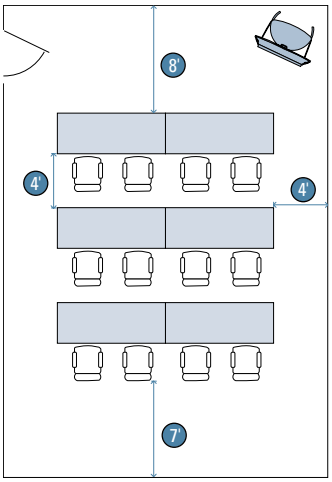

Side Wall Allowance of Four Feet (4')

A minimum of four feet (4') from a side wall to the edge of a table should be incorporated into your configuration. Increase the distance for larger rooms.

Aisle Allowance at Four Feet (4')

If an aisle is needed, allow a minimum of four feet (4'). This dimension should increase with your room size.

The drawing below illustrates the guidelines above.

The following are general guidelines only. Always refer to local codes for restrictions and requirements.

Reference information here originally appeared in Architectural Graphic Standards, published by John Wiley and Sons; and in US Government publications for compliance with the ADA (Americans with Disabilities Act).

Also, be sure to check US Government publications for compliance with the ADA (Americans with Disabilities Act).

Common Seating Dimension Requirements

General spacing of thirty inches (30") of lateral space per chair at a table is standard. A minimum of twenty-four inches (24") may work, but will depend upon your chair style and table dimensions. Allow a minimum of thirty to thirty-six inches (30"-36") for wheelchair space at a table.

Most wheelchairs are designed to fit beneath a standard table with a twenty-nine inch (29") table top height. However, some wheelchairs require tables with tops at thirty-two inches (32") in height. Allow an additional twelve to eighteen inches (12"-18") in aisles where wheelchairs may be situated back to back.

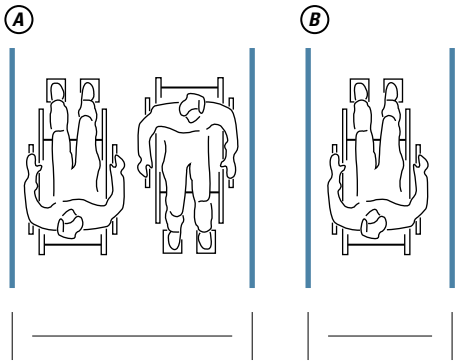

A rule of thumb for cafeteria style seating is to allow a minimum of twelve square feet (12 ft²) for each seat.

If using square tables and seating, there should be a minimum of sixty-six inches (66") between tables. This allows for a thirty inch (30") aisle and two (2) chairs. Diagonal seating requires a thirty-six inch (36") minimum between table corners.

Since every space has its own unique size and function, it is important that you consider the aforementioned guidelines when planning your space. Be sure to allow adequate space for aisles and plan your rooms around walls and other permanent fixtures such as doors or windows. Anticipate the type of activity that will be going on and plan enough space at the table for every movement of personnel when seated.

Don't forget to consider power and data needs also. For help planning and selecting the power and data options that are right for your space, see the Power and Data price list.

Studio Steel®

Versteel's "urban fabrication" process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Tops
Laminate and veneer tops are 1 ¼" thick. Corian® tops have a 1" top thickness. All are standard with square corners.

Leg Materials
Ash, Cherry, Maple or Walnut triangular wood legs are available in the standard Versteel finishes. The metal reveal is available in any standard powder coat, Chrome or Nickel.

Features
The 30" tall tables are standard with 1 ½" diameter nylon adjustable glides. Glides allow ½" adjustment of the table.

Legway Wire Management
Black plastic legway managers are mounted in the top and bottom of the leg guiding the wire(s) from the underside of the table to the power source while maintaining visibility of the wires. One set of legway managers will be sent with every table.

Laminate and Veneer, Standard Core Construction
The standard top construction consists of 45-50 lb particleboard, surfaced with a high pressure laminate or plain sliced veneer face. A backer sheet is laminated to the underside of the top. Tops are shipped with rectangular understructure attached and pre-drilled for field installation of bases and accessories.

Corian® Construction
Tops are ½" Corian® with a 7/16" thick plywood subtop glued to the bottom side with a ½" Corian® rim applied to conceal the plywood subtop. The underside is bored to allow pressing in metal screw inserts for field installation of the legs and/or connectors.

Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Tops
All tops are 1 ¼" thick and are offered with fixed or slim-tilt bases. Tables must be in lowest position to tilt.

Base Styles
The Sky Adjustable Height table is available in five base styles to coordinate with the following tables series: Brattice, Eliga, Performance, Skware and Vela. The rectangle tables offer T or cantilever bases. Columns are round on all base styles.

Sky bases are intended to coordinate with fixed height tables in other series. Bottom rails will match fixed height tables; however, the column may differ to accommodate the adjustable height mechanism.

Base Materials
The base is available in Versteel's standard powder coat offering or Studio Steel®. Tables are not available in Chrome or Nickel.

Casters
Tables are standard with two locking casters on the user side and two non-locking casters on the approach side, with the exception of tables with a Vela base style. Vela base style tables will have four locking casters. Optional glides are available at no upcharge.

Dual Wheel, black 2" diameter casters are standard on Brattice, Eliga, Performance and Skware base styles. The Vela base includes the series-specific, unique Vela-profile 3" diameter casters. Each caster is fitted to a reinforced caster receiver.

Adjustable Height
Sky Adjustable Height tables offer infinite adjustability from sit to stand or anywhere in between. Tables with casters (standard) have a 29" to 42" height range and those with glides have a 27" to 40" height range. All Sky tables are ADA compliant.

Operational Standards
These patented height assist tables are manufactured using pneumatic cylinders. The greater the weight placed on the table top, the greater the effort will be required to operate the pneumatic assist. The inverse applies when lowering the table.

Wire Management
The slim-tilt tables include two clear plastic wire managers which are formed to create a J channel. In addition to housing wires, these channels also act as a bumper between nested tables to prevent table top damage.

Laminate and Veneer, Standard Core Construction
The standard top construction consists of 45-50 lb particleboard, surfaced with a high pressure laminate. A backer sheet is laminated to the underside of the top.

PVC Flat or Fluted Edge

Edge of 2mm PVC hot melt banded to the top with ⅛" radius at the top and bottom. Available with 1 ½" radius corners or square corners.
Offered in twenty-one (21) standard colors.

Wood Flat or Fluted Edge

Wood banding hot melt banded to the top with ⅛" radius at the top and bottom. Available with 1 ½" radius corners or square corners.
Offered in Ash, Cherry, Maple or Walnut materials.

Laminate
Versteel's standard offering of laminates includes over 900 laminates from Formica, Nevamar, Pionite and Wilsonart.

Laminate manufacturers change standard offerings frequently, making it possible a standard product can become unavailable. Versteel cannot be responsible for any inconvenience this may cause.

Studio Steel®
Versteel's "urban fabrication" process leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.
Studio Steel Process $158

Powder Coat Finishes
All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.

Shipping Schedule

Standard Items

Tables + Benches	5 WEEKS
Stools	3 WEEKS
Seating	3-4 WEEKS

Care of Butcher Block Tops
Clean all surfaces frequently with water-dampened soft cloth, moving the cloth with the grain direction. Quickly buff dry. Immediately remove any liquids that come in contact with wood surfaces using a blotting action to absorb liquid. Lift objects to move them. Never pull them across the finished surface.

Avoid exposing furniture to extreme heat and cold or to wide humidity variances. Avoid exposing furniture to strong sunlight. Do not use soaps, commercial cleaners or harsh solvents (nail polish remover, acetates, etc.) as they will cause finish deterioration.

Care of Powder Coat
Clean with a mild soap solution and rinse with clean, clear water. Wipe the entire surface and follow with a clean, dry cloth to buff dry.

Metal Processing

Studio Steel® is Versteel's "urban fabrication" process which leaves the telltale signs of welding and assembly on the surface, highlighting a manufacturing aesthetic. Choosing a clear or transparent powder coat is recommended, allowing tonal striations (created as a result of extreme heat), natural textures, and the inherent qualities of raw steel to show through.

Powder Coat Finishes

All powder coat finishes in the Versteel offering have been formulated with the use of epoxy, polyester or epoxy and polyester blends to maximize the finish durability.

Tops
Laminate and veneer tops are 1 ¼" thick. Corian® tops have a 1" top thickness. All are standard with radius corners.

Leg Materials
The elliptical legs are available in Versteel's standard or Studio Steel® process. All standard powder coat finishes are available in addition to Chrome or Nickel when Studio Steel is not specified.

Features
The 30" tall tables are available with two (2) USB ports integrated into two or four legs. If no USB ports are desired the legs will have Black Anodized end caps which match the Black Anodized tubular understructure. A 10' long power infeed cord provides power to all USB ports. Tables are standard with 2" diameter nylon adjustable glides. Glides allow .5" adjustment of the table.

Wire Management
The tubular understructure incorporates wire management. Legway wire managers are included when tables are ordered with USB ports.

Laminate and Veneer, Standard Core Construction
The standard top construction consists of 45-50 lb particleboard, surfaced with a high pressure laminate or plain sliced veneer face. A backer sheet is laminated to the underside of the top. Tops are shipped with rectangular understructure attached and pre-drilled for field installation of bases and accessories.

Corian® Construction
Tops are ½" Corian® with a 7/16" thick plywood subtop glued to the bottom side with a ½" Corian® rim applied to conceal the plywood subtop. The underside is bored to allow pressing in metal screw inserts for field installation of the legs and/or connectors.

PVC Flat or Fluted Edge

Edge of 2mm PVC hot melt banded to the top with ⅛" radius at the top and bottom.
Offered in twenty-one (21) standard colors.

Reverse Bevel Acrylic

Edge of 2mm acrylic edge banding hot melt banded to MDF core. A reverse bevel is then cut into the edge exposing the MDF on the reverse bevel. The MDF is then clear coated.

Wood Flat or Fluted Edge

Wood banding hot melt banded to the top with ⅛" radius at the top and bottom.
Offered in Ash, Cherry, Maple or Walnut materials.

Corian® Eased Square Edge

A traditional 1" flat edge with a small radius where horizontal surfaces meet vertical for comfort and a softened aesthetic.
Offered in seven (12) standard colors.
